

WORKING TOOLS OF NEWLY MADE FATHER

I now present to you the Working Tools of a newly made father:

They are:

- The Baby Powder
- The Napkin
- The Safety pin

The Baby Powder is the first article placed in the hands of a new father to enable him to soothe and comfort all irritations before placing the Napkin and Safety pin on their proper base.

With the Napkin he is enabled, with accuracy and precision, to cover the faces and angles of his work and thus keep rude matter in due form.

The Safety Pin enables him to secure and fasten all coverings and thus provide against unfortunate accidents.

You are not, however, called here as a speculative, but rather as a fully operative and experienced father and to you these tools are delivered as vehicles for further instruction.

- Thus the Baby Powder teaches us comfort
- The Napkin prevention, and
- The Safety Pin security

And so, by soothing irritations, preventing accidents and securing fastenings, we trust that you may rest well and enjoy that love whence all pleasure emanates.
